

The stilt-shaped building that functions as a cafe on Holbung Hill is the right place to enjoy the natural scenery of Lake Toba in a steep topographic area.

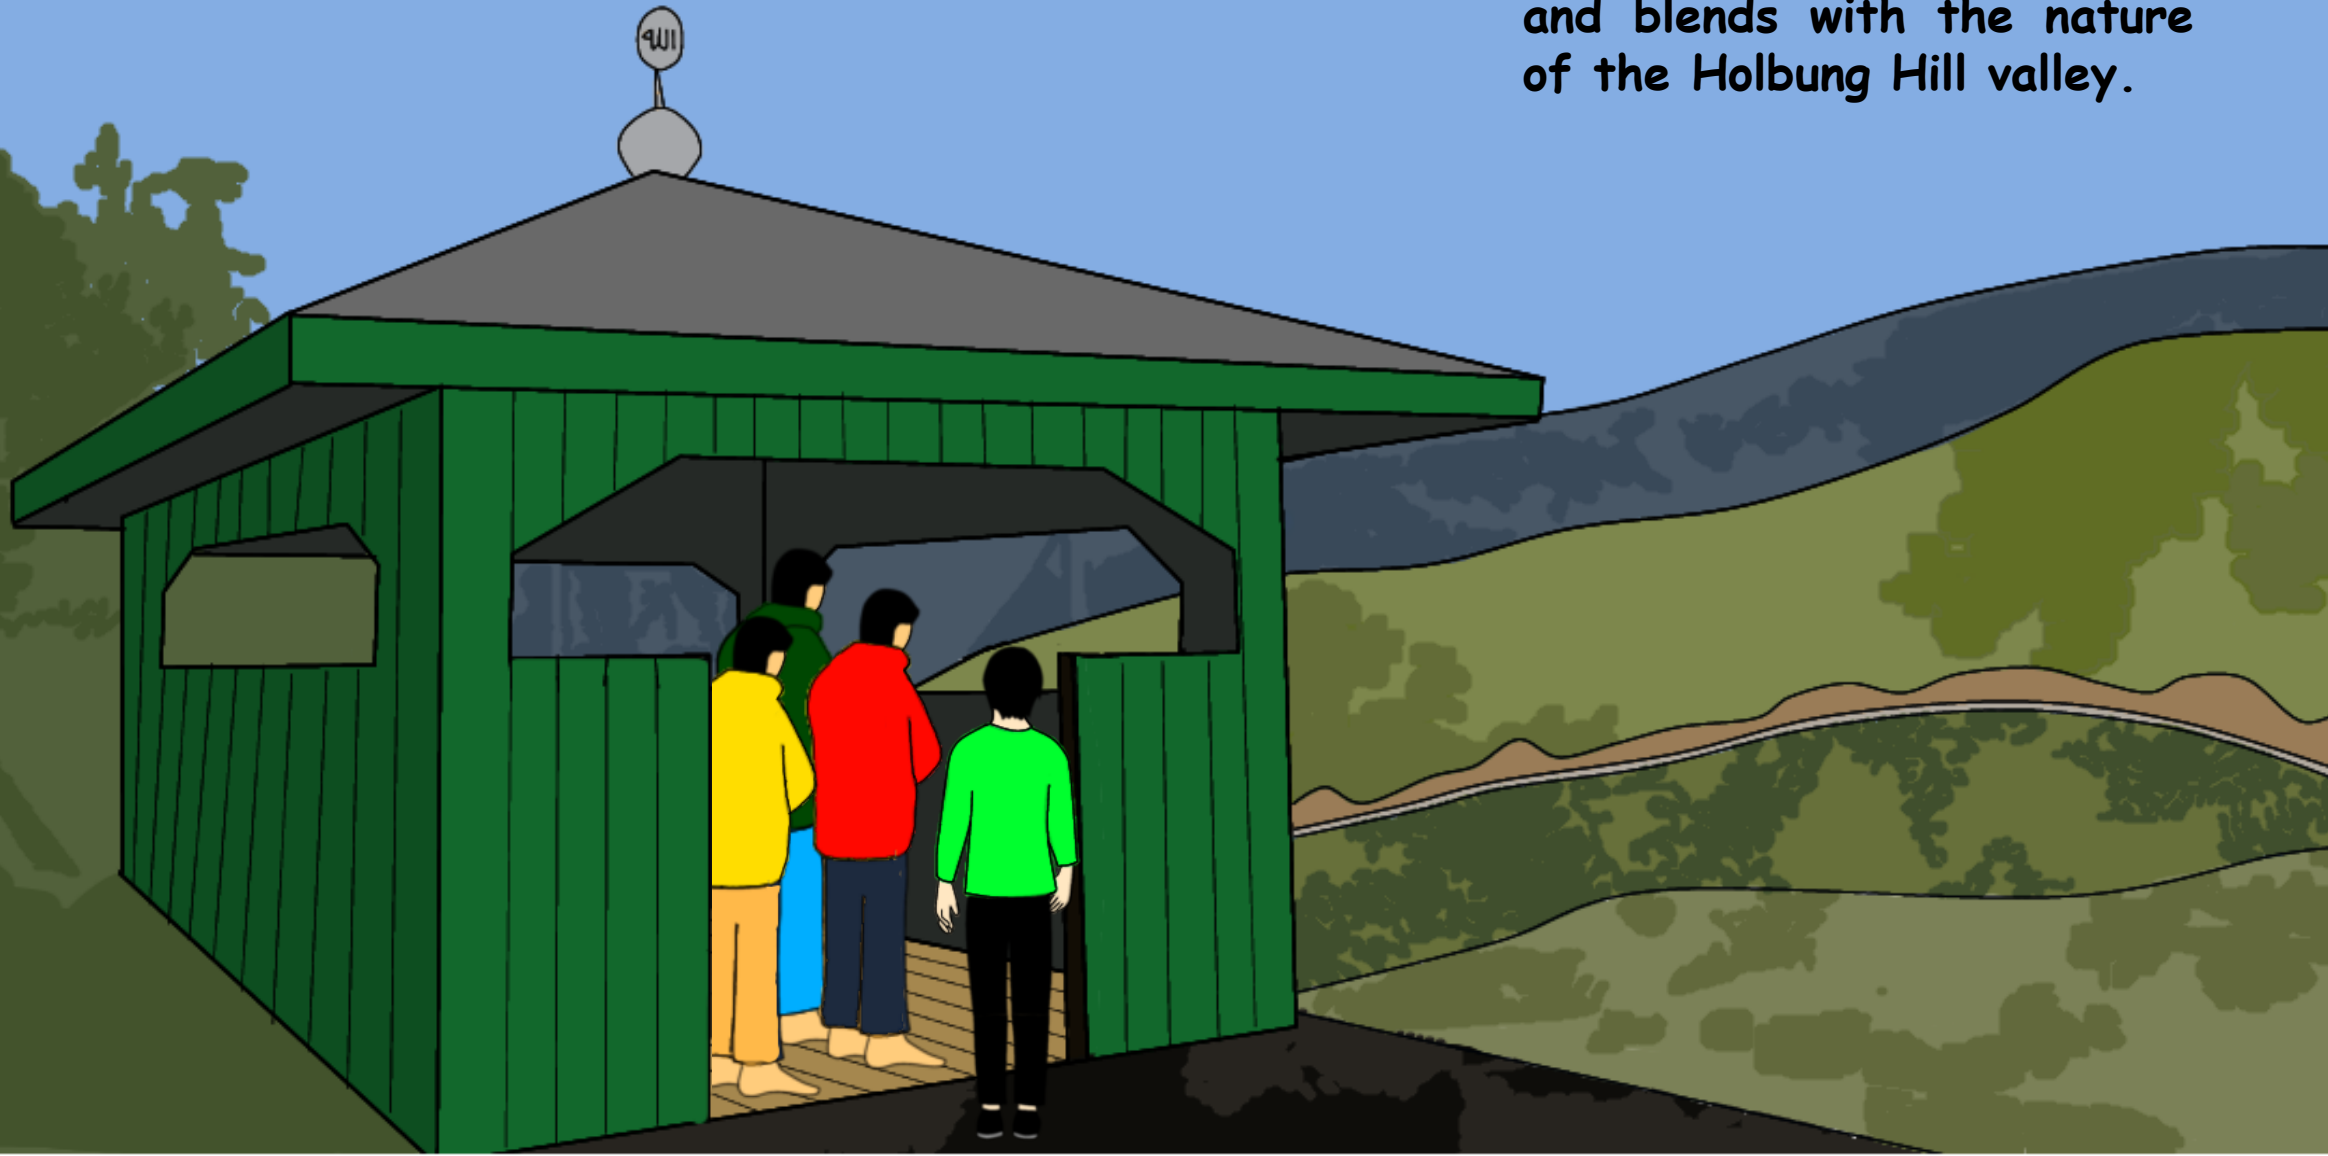

Dear visitors,  
please queue  
for buying  
the tickets!

The ticket counter building at Bukit Holbung is designed with the concept of green building to protect the environment by applying solar panel technology.

A small prayer room that was built with equilateral dimensions in an open design and blends with the nature of the Holbung Hill valley.

The small cafe building in the Holbung Hill valley requires an integrated arrangement with local environmental wisdom and the existence of Toba Batak Culture.

This land use conflict in the Holbung Hill area must not interfere with Indonesia's tourism industry and the Lake Toba ecosystem as a super-priority destination.

The architecture of residential buildings for residents in Holbung Hill has undergone many changes. However, the house on stilts equipped with home supports in the form of poles and other additional beams further strengthen the local wisdom of the environment, which is dominated by the ethnic Batak community in that place. The village in Holbung Hill is occupied by a group of people who share the same clan, so family ties are very close in that settlement. Usually, village is only inhabited by a few family members who come from one ancestor. They work together to build and repair houses, together. The yard in front of the house becomes the gateway where it is a place to hold deliberations and discussion meetings about traditional life or things considered necessary by the community.

The architecture and layout of the buildings in the village of Bukit Holbung show ethnic Batak houses that use wood and are decorated with beautiful ornaments that have certain meanings related to welfare, security, and protection for residents and their village. The foot of the building, such as under a house on stilts, is usually used as a cattle pen. The floor height of the house varies based on the desire to raise livestock. Rows of residential buildings in this village are separated by a large yard where children play, a place for joy and sorrow in the village, and a place to dry things.
